Great Game, I wish more of these games were made as it actually requires you to think about what you are doing. Yeah sure, it would have been nice if you could pack the tables in tighter and hire more Captains. But this drawback means you have to find a solution which is part of the principle of a good biz strat.

I hope they make a 3rd installment and recommend this game highly.. Very disappointing game. I was hoping this would be like the Gangsters PC game but it is nothing like it. I think the developer spend more time\money on the teaser trailer than the actual game.. Shows a lot of promise. Still needs a lot of work, but I will keep.. Not gonna go into detail about how amazing this game is, it really is.

But the Steam version is ♥♥♥♥ing broken and has been broken for over three years now.

Unfixable graphical stuttering, loading problems and more.

If you want to buy this game, buy it from their website and play on the seperate launcher.. Want to alternative support developer other than donate Limited Edition in Official Website? Then buy this DLC. You got all amazing Original Sountracks from in game with good quality in MP3 format (find it under Nekoishi directory folder). Dont worry, still worth it even buy full price since the standard and limited edition are FREE. Btw, I wish they remake full song in duration 3 minutes above for 'A Sunny Day is Watching over You (Vocal)' looks great. :3. Like the good old TMNF, but better graphics, can make blocks, more options..... i already have resource pack, but i need more and it says i can have multiple purchases but i cannot add another one... any help ?

. It's cheap.. 'I really love this game it is fun and easy to play the story is very imaginative i love it. Imagine playing pokemon but with deeper story and the minimon follow you and you can also fight it doesn't have to be the monsters that fight the opoenig to the story capitaves you right off the bat i cant wait for the final product. The game is interesting as a mystery adventure. playability takes getting used to on a PC. As the game progresses, upgrades are readily available (at in game money purchase) at the dock. I upgraded to the laser diode to help see better, and all it seemed to do was blind me. But I think I'm hooked because I want to see what happens next. So I will continue to see if it entertains or disappoints. I've been playing video games since pong. #oldmanfeedback.

A good visual story for which you'll spend one or two evenings. The plot unfolds around one of the old cities - Aksaypolis, which holds many secrets. The city itself is a mix of industrial progress of the 20th century and ancient settlements. The authors have worked well to create an atmosphere of fear and despair, which is realised not only by the text, but also by art with sounds. This style is just very well perceived and contributes to immersion in the story.. Cookie is a weiner. Not actually funny. Questions get recycled. So you eventually know all the answers.

This game is more fun when you play it as a troll.

My suggestion:

Make your 'lies' jokes about other players.

The person who wins is the person with the most likes.

Cookie sucks.. This is recommended if you really want the extension it also comes with the Class 466. I recommend buying this when it's on sale or in a bundle. But definitely recommended although the acceleration on the 466 is very quick including braking

Rating: 9/10. By at your own risk.

The achievements are broken, the game doesn't give any description of anything.

The survival mission I think is a joke.

I beat the game around 14 hours but I was playing a mobile game at the same time & I replayed all levels 2 times to level up.

Pros:

I like the enemy designs

I didn't dislike playing the game.

It's a simple TD.

Can't beat the price when it's on sale.

Cons:

The game was OK

The mechanics some times feel still "mobile" compatible.

The game gives zero description of all enemies.

The game really could probably be beat without ever repeating any level (so easy).. I just love this dlc and i think all of you know why. Sadly, all the awesome new team ultimates have fps drops, even with a super good pc, fix

dat\u2665\u2665\u2665\u2665\u2665please kimundi! Otherwise, the dlc is really good, and the sound fours are very unique, each of them having his way to play. Unpolished Tropico clone.. SICKKKKKKKK. It's better than garbage BfA...so if you're one of the refugees switching, it's okay to get. Upstart is a little rough, since the beginning content isn't as polished as wow, but it's a decent game overall.
